---

Dear Ms. Cook,

As discussed during the April 21, 2017 conference call, CSRA has performed a review of the information presented in the draft ground water migration pathway description excerpt provided by the Region on April 18, 2017. Per the Region's request that CSRA provide it with a list of any issues associated with this excerpt, CSRA has attached a suggested outline for structuring the ground water migration pathway description in the HRS documentation record. CSRA has also identified suggested topics to discuss within the ground water migration pathway description (see the italicized text included in the outline).

CSRA notes that it has not identified specific concerns associated with the ground water migration pathway excerpt, as this section may be substantially revised. Please let CSRA know if you have any questions.

Respectfully,

Josephine Bramble  
CSRA LLC
